User Manual - Dahua IPMECD-0232-M30

1. Introduction

- **Product:** 3-meter straight arm for vehicle access control systems.
- **Compatibility:** Installable on both right and left sides.
- **Usage:** Designed for vehicle access control systems.

2. Key Features

- **Material:** Aluminum, lightweight and durable.
- **Length:** 3 meters, ideal for medium-sized entrances.
- **Anti-crushing Strip:** Elastic rubber to prevent vehicle damage.
- **Resistance:** Anti-oxidation treatment, prolongs outdoor lifespan.

3. Installation Guide

- **Mounting:** Compatible with Dahua vehicle barriers and other universal barriers.
- **Safety:** Ensure the arm is securely attached and the rubber strip is properly aligned.

4. Maintenance

- **Regular Inspection:** Check the condition of the anti-crushing rubber strip.
- **Protection:** Clean the aluminum periodically to prevent surface corrosion.

5. Applications

- **Access Control:** Ideal for parking lots and controlled vehicle access areas.

6. Safety

- **Precautions:** Ensure the barrier is properly aligned to avoid malfunction during opening/closing.
