Material	Cold rolled steel sheet
Dimensions	300mm × 240mm × 100mm
Color	White
Net weight	3 kg
Maximum number of modules	4
Operating temperature	– 10 °C to +50 °C
Operating humidity	≤ 95% RH (non-condensing)

3. Installation Instructions

Prerequisites

- Make sure you have the necessary tools: drill, screwdriver, level and pencil.
- Check that the installation surface is flat, sturdy and level.
- Avoid installing in environments exposed to extreme humidity or high temperatures.

Installation Steps

1. Surface Preparation
   - Select a suitable location for the box, considering that the environment must be protected from moisture and dust (IP20).
   - Use the template to mark the drilling points on the wall.

2. Drilling and Fixing
   - Drill the wall according to the marked points.
   - Insert the fixing plugs (if necessary).
   - Place the box on the wall and secure it using the screws provided.

3. Installing Modules
   - Open the box and place the modules inside the compartments.
   - Make sure to correctly connect the module cables according to the manufacturer's specifications.

4. Closing and Verification
   - Close the box making sure the lid is secure.
   - Check that all modules are working properly.

4. Maintenance and Care

- Cleaning: Use a dry or slightly damp cloth to clean the surface. Do not use abrasive chemicals.
- Periodic Check: Regularly check that the modules and structure are firm and functioning correctly.
- Avoid Excessive Humidity: Although it has IP20 protection, this box is not designed for environments with constant condensation.
