User Manual - Dahua IPMECD-0312-M30

1. Introduction

- **Product**: 3-meter aluminum arm for Dahua/universal vehicle barriers.
- **Compatibility**: Suitable for installation on both right and left sides.
- **Usage**: Designed for vehicle access control systems.

2. Key Features

- **Material**: Aluminum, lightweight, and durable.
- **Length**: 3 meters, ideal for medium-sized entrances.
- **Anti-crushing Strip**: Elastic rubber to prevent vehicle damage.
- **Resistance**: Anti-oxidation, prolongs outdoor lifespan.

3. Installation Guide

- **Mounting**: Compatible with Dahua vehicle barriers and other universal barriers.
- **Safety**: Ensure the arm is securely attached, and the rubber strip is properly aligned.

4. Maintenance

- **Regular Inspection**: Check the condition of the anti-crushing rubber strip.
- **Protection**: Clean the aluminum periodically to prevent surface corrosion.

5. Applications

- **Access Control**: Ideal for parking lots and controlled vehicle access areas.

6. Safety

- **Precautions**: Ensure the barrier is properly aligned to avoid malfunction during opening/closing.

7. Technical Support

- For additional issues, contact Dahua technical support with the product's serial number.
