User Manual
Dahua Conventional Fire Alarm System Demonstration Case

---

1. **Introduction**
   The Dahua conventional fire alarm system demonstration case is a compact and portable solution designed to showcase conventional fire alarm system products. This case includes spaces for control panels, heat and smoke detectors, and other essential components. Its design makes it ideal for customer demonstrations, training sessions, and marketing events.
   Main Features:

- Compact and portable design with universal wheels.
- Durable aluminum material for enhanced longevity.
- Compatible with a wide range of Dahua products.

---

2. **Included Components**
   The case can hold the following equipment (not included by default):

- Conventional fire alarm control panels.
- Heat detectors.
- Smoke detectors.
- Other compatible devices (models: DHI-HY-C102-4, DHI-HY-C131, DHI-HY-C132, among others).

---

3. **Using the Case**
   Preparation:

- Ensure the case is placed on a stable surface before opening it.
- Unlock the latches and carefully lift the lid.

Installing Equipment:

- Place the control panels, detectors, and other devices into their designated slots.
- Connect the devices using the appropriate wiring (if necessary).

Demonstration:

- Connect the case to a power source if the devices require electricity.

- Simulate alarm scenarios by manually triggering the smoke or heat detectors.
- Explain the functions and signal flow of the system to the participants.

Transport:

- Ensure all devices are secured before closing the case.
- Use the handle and universal wheels for easy transport of the case.

---

4. **Maintenance**

- Clean the exterior of the case with a dry or slightly damp cloth.
- Avoid using harsh chemicals that may damage the aluminum finish.
- Regularly check the wheels and handle to ensure smooth operation.
- Store the case in a dry place, away from extreme temperatures.

---

5. **Safety Recommendations**

- Do not expose the case to direct sunlight for extended periods.
- Keep the case away from water sources or excessive humidity.
- Do not overload the case with incompatible devices.
- Disconnect all equipment before transporting the case.

---
